

Dutch Mirror Factory Most Innovative Hospitality Bathroom Mirror Manufacturer - Europe

When you're looking for the ultimate purveyors of luxury, it's important you find fittings that reflect the highest possible standards. The team at Dutch Mirror Factory knows this better than most, having made a name for themselves as suppliers of innovative mirror products at a price that takes people's breath away. We take a closer look at the team following their astounding success in LUXlife's Resort and Retreat Awards 2021.

Based in the east of the Netherlands, Dutch Mirror Factory has become a renowned provider of mirrors that reflect the sort of top quality that only European enterprises can offer. Hotels, hostels, holiday parks and cruise ships alike have been able to take advantage of their incredible deals, with the unique conditions of each country taken into account and built into the very fabric of the design.

At Dutch Mirror Factory, companies can find the perfect mirror, bespoke designed to suit their specific needs. The team offers custom-made mirrors and 'private label' collections to the bathroom industry, wholesale, hospitality and beauty sector, with everything from a few units to large quantities that can be seen across entire properties. With options for LED lighting, infra-red, Bluetooth, radio or with a clock, in frames that vary from round to oval, square to rectangular. It's little wonder that Dutch Mirror Factory is in such high demand.

The components used throughout each mirror are designed to be of the highest calibre. As such, they are lead and copper-free, corrosion resistant and entirely well suited for use in the (best) hotels and bathrooms. To deliver the mirror that is right for their extraordinary array of clients, the Dutch Mirror Factory team combines the height of design, the latest technologies and a background of innovative production to deliver mirrors in all shapes and sizes.

Few companies are capable of being quite so flexible as the team of Dutch Mirror Factory. They know that their customers each have a wealth of different needs and requirements and do their absolute best to meet and match every single one. The team has standard mirrors, available in both large and small quantities, as well as an entire department that focuses specifically on custom-made collections. This department has opened up the door to so many opportunities.

The custom-made part of the business has only begun to increase over the last couple of years. Fortunately, due to Dutch Mirror Factory's proactive part in the industry, it has the tools, the experience and the open mindset to not only anticipate, but to effectively react to and keep up with the changing nature of the market.

One of the challenges that the company has faced more recently has been the difficulty in finding the perfect materials that form the heart of a Dutch Mirror Factory mirror. Packaging materials, cardboard and aluminium are all in high demand. Where possible, the team has built up a stockpile for use so that they can continue to provide their customers with the high standard of delivery that they have come to expect.

When it comes to providing these sort of products, there's none finer than Dutch Mirror Factory. Their work sets the standard by which the rest of the industry operates. It's no surprise that the team continues to be in such high demand – a sure sign of their incredible success.
